

parties to develop the best policy for determining which areas of Alaska should be eligible for funding under Native programs. Whatever funding is available should be applied to all individuals living in areas designated as eligible for support under Native universal service programs.

Study area changes should not occur unless the state commission agrees to (or does not object to) such restructuring. Such changes should not occur without proper review and oversight of the RCA given the potential impact on customers.

In Alaska, there is no need, nor does the FCC have jurisdictional authority to control intrastate local and Lifeline services, Eligible Carrier Status, Local Calling Area designations, carrier of last resort designations for intrastate services, or selection of which carrier(s) should provide service to unserved areas. In Alaska, these matters are within the jurisdictional authority of the RCA, which has the regional presence and local experience to best address these matters.

If the FCC adopts a definition for Unserved Area, the definition should be treated as a guideline and not a state

mandate. Nor should the FCC require states to employ a competitive bidding process for determining which carrier should serve an unserved area.

As a last point, the FCC could assist rural health care providers in Alaska by allowing funding for infrastructure development; facilitating joining of entities when ordering services; and requiring satellite providers serving the western United States to include Alaska within their satellite footprint.

RESPECTFULLY SUBMITTED this 15th day of December, 1999.

A handwritten signature in black ink, appearing to read "G. Nanette Thompson", with a long horizontal flourish extending to the right.

G. Nanette Thompson
Chair
Regulatory Commission of Alaska
